Court Judgment Explainer

Tech pack

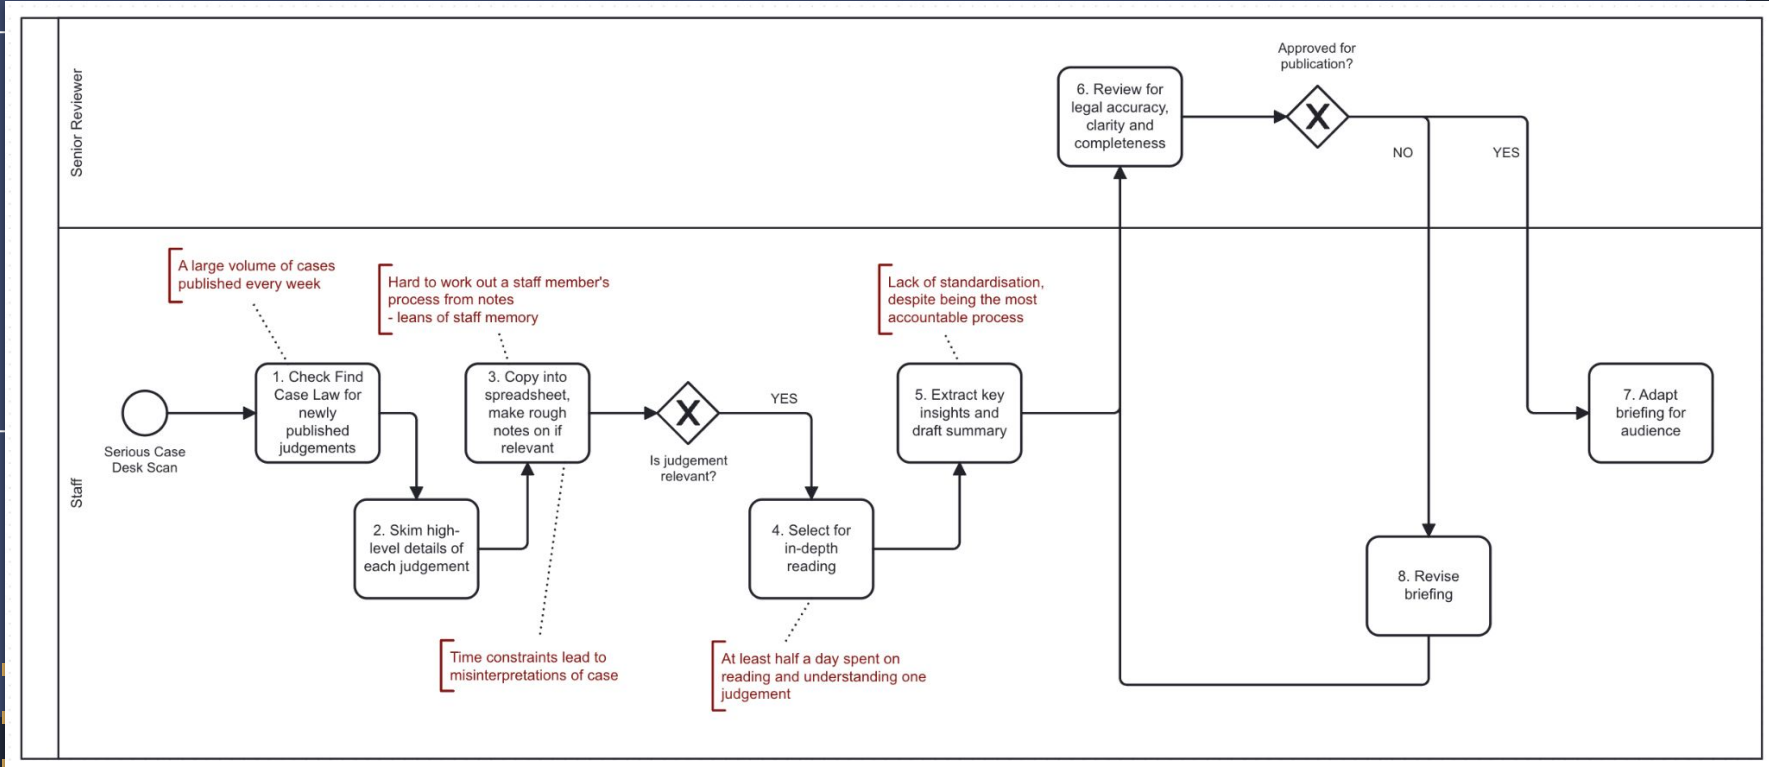

Tooling specification

Tool	Justification
n8n	Enables rapid deployment of MVP solution, with extensive integration capabilities across a range of APIs
LLM (OpenAI GPT-5-mini)	Used in previous automation workflow development, delivers results of an acceptable standard with little cost per token
Tableau	Integrates well with selected data storage solution, enables rapid dashboard development
AWS RDS	Aligns with the team's skill set, scalable and integrates well with other tools
Slack	Used in the Case Desk team's current process

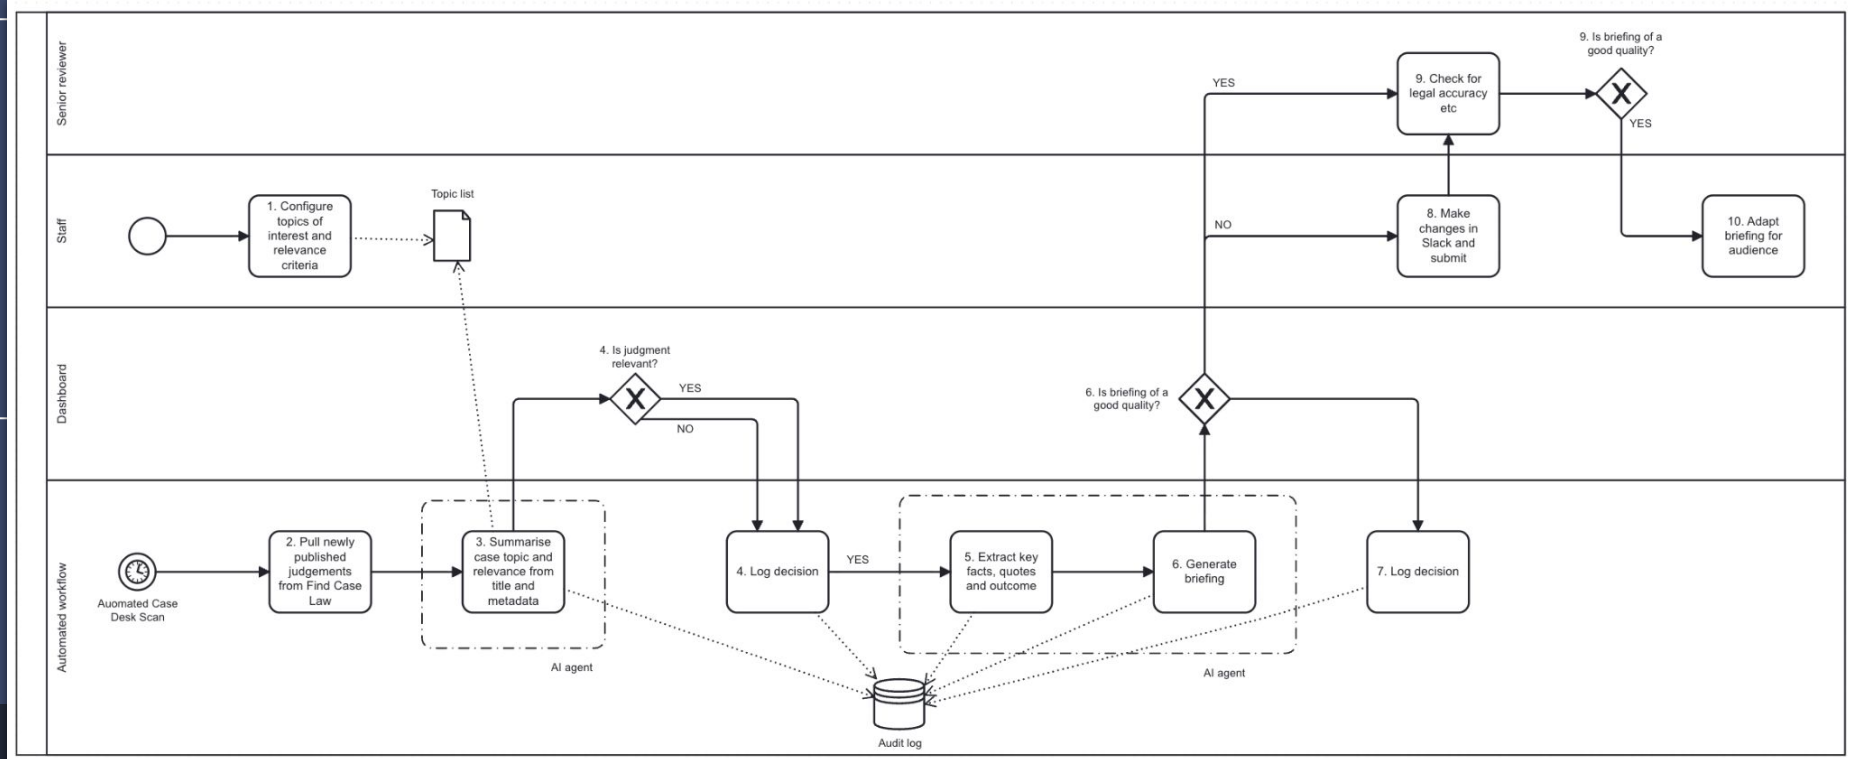

Cost breakdown

Cost	Plan	Monthly cost (£)	Net new monthly cost (£)	Notes
n8n	Pro	50	50	Assuming 600 executions per month within subscription limit
LLM	chatgpt-5-mini	3.74	3.74	Assuming 30 cases per day → 600 cases per month
AWS	Pay-as-you-go	3.82	3.82	Fixed up to 20GB, then scales at 0.03p per 100MB
Tableau	Enterprise	28	28	No complex analysis; within bounds of subscription features
Slack	Pro	5.57 pp	0	Already used by the client
Total			85.56

To-Be process map

Automation workflow

Workflow 1: JusticeLens Ingest & Deterministic Triage

01. Ingest & Normalise

Scan run is logged, Topic Config loaded, and Atom feed fetched. Fields are normalised and cases upserted into the **cases** table as Layer 0.

02. Keyword Scan

Full judgment XML is fetched and text extracted. A deterministic Keyword Scan counts terms and calculates density, ensuring explainable filtering.

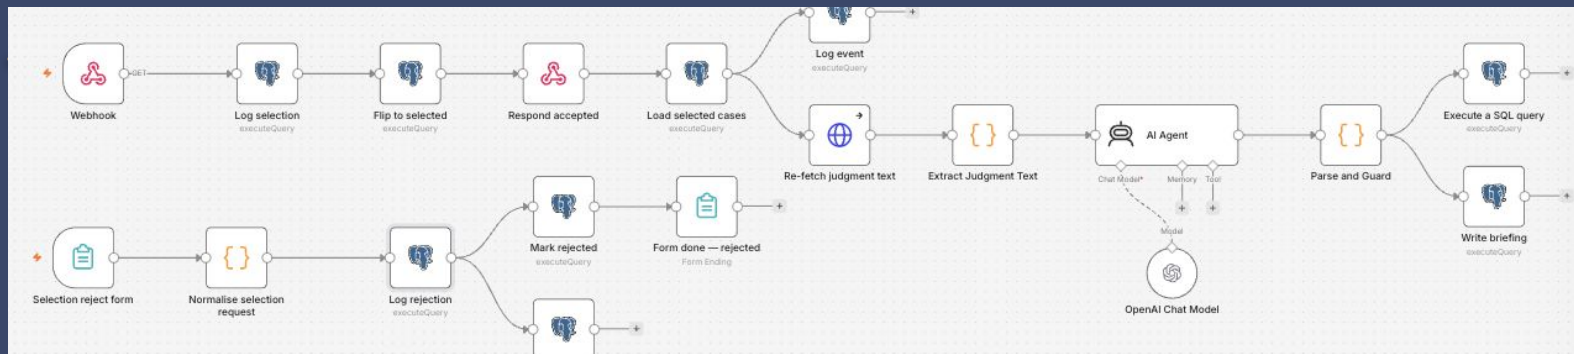

03. Routing Gate

Routing node applies a boolean gate. Failed cases are marked rejected. Passed cases have Layer 1 persisted and topics written to **case_topics**.

04. AI Assessment

AI Agent assesses relevance. Output is validated and assigned a Green / Amber / Red tier, then fanned out and moved to the human gate at **triaged**.

Automation workflow

W2: Selection & AI Briefing

Webhook fires briefing. **gpt-5-mini** produces structured briefing pack. which populates separate fields in the database.

Parse & Guard validates quotes and fields, writing back to **cases** as briefed.

W3: Staff Review Gate

Webhook is routed through Switch. Approval flips case from **briefed** to **senior_review**.

Edit builds Slack form. Rejection marks case **rejected_at_ai_summary**.

W3.1: Senior Review Gate

Webhook is routed. Approval flips case from **senior_review** to **published**.

Rejection logs reason, marks case **rejected_by_senior_reviewer**, and returns to staff for rework.

This is where new judgments land after the automated first-pass filter has already narrowed the feed by court and keyword. Each row is a case still awaiting a human decision: its title, the keywords that flagged it, an AI-generated relevance score with its reasoning, and who (if anyone) is currently assigned. Use the filters below to narrow by topic, court, owner, how recently a case was added, or a minimum relevance score, or search by name directly. Click anywhere on a row to open its full detail — that's where you'll find the case's extracted facts and issue, and where you actually decide whether it goes to Deep Dive or gets rejected.

Cases land here once AI extraction is complete and a staff member has already checked the draft. Each row shows the case, a short summary of what the AI extracted, and a guardrail check flagging anything needing extra care before publication — sensitive content, unverified quotes, or similar. Filter by flagged status, owner, or how long a case has been waiting. Click a row to open the full draft, review the facts, legal issue, and AI confidence for that extraction, then approve it for publication, edit in slack, or reject.

E J W Builders Limited & Anor v Audrey Marshall & Ors

FACTS

Parties: Appellants (Claimants below) E J W Builders Limited and Mr Eamonn Wynne; Respondents (Defendants below) Mrs Audrey Marshall and Mr Edward Marshall, with joint trustees in bankruptcy as third and fourth respondents (¶14). Claim: Appellants alleged an oral partnership or contractual joint venture reached on or before 8 February 2019 under which Claimants would be reimbursed costs, Mr Wynne paid a salary of £1,500/week, and profits split one-third to Claimants and two-thirds to Mr and Mrs Marshall; date 8 February 2019 derived from a WhatsApp message (¶18). Defence: Respondents relied on a JCT building contract dated 17 June 2019 between Marshalls (customers) and EJW (contractor) at a contract price of £825,000, signed 17 June 2019 (one week after work commenced) (¶19, ¶131). Trial judge findings: HHJ Paul Matthews found Mr Wynne an unsophisticated witness with poor recall and that his evidence could not be relied upon except where corroborated (¶113); found the JCT contract was entered into on 17 June 2019 (¶19, ¶131); concluded there was no single business and no partnership or binding profit-sharing agreement, and that the only contract was the JCT contract (¶119, ¶163). Documentary evidence: Claimants relied on several documents including a WhatsApp message (8 Feb 2019), emails of 13/24/25 June 2019, a solicitor's email of 7 August 2019, a January 2020 'sales to profit tracker', and later emails in 2020-2021; the judge treated much of this as discussions rather than concluded agreement (¶125, ¶156, ¶157, ¶154). Procedural posture and result: Appeal from HHJ Matthews' dismissal of the claim; the Court of Appeal dismissed the appeal (¶11, ¶12, ¶160).

LEGAL ISSUE

Whether, on the facts, the Claimants had established (a) that a partnership existed between them and the Marshalls such that the

Published cases that have cleared senior review land here, ready to be pulled into an audience-tailored briefing pack. Each row shows the case, its topic tags, and whether it carries a sensitivity flag. Filter by court or publication date, or click a row to open its full detail — that's where you'll find the draft briefing, and where you add or remove it from your pack. Cases you've added sit in the table above, ready to review, clear, or send once your pack's complete.
