

Limitations Log

Dashboard

- Does not log any identification for the human reviewer giving approval or rejection
 - **Solution:** Integrate the client's Identity and Access Management to extract names and emails
- Interactive functionalities are fragile
 - **Benefit:** straightforward to maintain after hand-off to the client

Automation workflows

- No interface to change configured topics to search for
 - **Solution:** Create a topic configuration page on the dashboard
- The initial ingestion filtering does not have validation for false negatives
 - **Solution:** Add an AI checkpoint to independently validate outputs
