The current process

Case Desk team

Check the National
Archives

Select relevant
judgments

Create briefings to
summarise those
judgments

What needs must be met?

→ **Faster triage and summarisation**

“What takes a lot of time right now is trying to find the cases that are relevant, and also reading and understanding all the legal language.”

→ **Audit trail**

“...we cannot see as a team what we are actually looking at, what we have looked at, what we’ve discounted, and why.”

→ **Human oversight**

“[AI] can hallucinate. It can have biases. So keeping a human in the loop is quite important to me.”

→ **Objective output**

“Our reputation and our ethics are around being open, transparent, and honest.”
